

## WASKlim: National Adaptation Strategy on Climate Change

### ***Brief description:***

Climate change demands adaptation strategies on several levels. On behalf of the German Federal Environment Agency (Umweltbundesamt - UBA) DIALOGIK carries out a project to support the development of a national strategy of adaptation to climate change. The project focuses on water management. DIALOGIK evaluates the results of an expert survey, develops on the basis of these results a questionnaire for an Expert-Delphi and conducts the Delphi-workshop. Furthermore, DIALOGIK will provide support in the preparation and performance of further workshops.

### **Duration:**

01.11.2007 - 31.08.2009

### **Project Leader:**

Marlen Schulz  
Viola Schetula

### **Supervision:**

Prof. Dr. Ortwin Renn

### **Project Partners:**

UDATA – Umweltschutz und Datenanalyse  
Institut für Wasserwesen der Bundeswehr Universität München Institut für Verkehrswesen  
und Raumplanung der Bundeswehr Universität München
